

RENEWABLE ENERGY

An International Journal
The Official Journal of WREN - The World Renewable Energy Network

Editor-in-Chief:

A.A.M. Sayigh

See [editorial board](#) for all editors information

Description

The journal seeks to promote and disseminate knowledge of the various topics and technologies of renewable energy and is therefore aimed at assisting researchers, economists, manufacturers, world agencies and societies to keep abreast of new developments in their specialist fields and to unite in finding alternative energy solutions to current issues such as the greenhouse effect and the depletion of the ozone layer.

The scope of the journal encompasses the following:

Photovoltaic Technology Conversion, Solar Thermal Applications, Biomass Conversion, Wind Energy Technology, Materials Science Technology, Solar and Low Energy Architecture, Energy Conservation in Buildings, Climatology and Meteorology (Geothermal, Wave and Tide, Ocean Thermal Energies, Mini Hydro Power and Hydrogen Production Technology), Socio-economic and Energy Management.

Renewable Energy accepts original research papers or any other original contribution in the form of reviews and reports on new concepts. It promotes innovations, papers of a tutorial nature and a general exchange of news, views and new books on the above subjects.

Bibliographic & ordering Information

ISSN: 0960-1481

Imprint: PERGAMON

Commenced publication 1985

Subscriptions for the year 2008, Volume 33, 12 issues

Institutional online access: [ScienceDirect eSelect](#)

For purchase of online access to this journal on ScienceDirect by credit card.

Institutional price: [Order form](#)

EUR 2,041 for European countries and Iran

JPY 271,000 for Japan

USD 2,283 for all countries except Europe, Japan and Iran
